

Thomas Gibbons '87 is a Commissioner at the Jersey City Municipal Utilities Authority, where he provides leadership in governance, contracting, change control, and green infrastructure. Tom created one of the most rigorous change control procedures in the state and led the organization towards a more sustainable future by piloting the first green infrastructure projects in Jersey City. Prior to joining the JCMUA, Mr. Gibbons was Chairman of Jersey City's Environmental Commission where he also advocated for green infrastructure and urban sustainability. He has spent the past 30 years as a Program Manager for several prominent environmental and engineering companies rising to the level of Assistant Vice President. Tom serves on the Board of Directors of the Association of New Jersey Environmental Commissions and is Co-Chair of START, which is Jersey City's Municipal Action Team for Stormwater Treatment and Resiliency. Tom holds a Bachelor's degree in Engineering from Lafayette College holds certifications from the Project Management Institute and the US Green Building Council.
